Software Engineer | Full Stack & AI Systems

Full Stack Engineer with hands-on experience building and maintaining production SaaS systems. Strong background in backend development, API design, databases, and frontend integration. Experience across multiple internships and real-world products, including Formester. Comfortable working end-to-end on scalable systems in fast-paced environments.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Backend: Node.js, Ruby on Rails, Express.js, REST APIs, Webhooks

Frontend: React, Next.js, Vue.js, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, MySQL

Tools & Concepts: Git, API Design, System Design, Background Jobs, WebSockets, Deployment, Flutter

PROFESSIONAL EXPERIENCE

Full Stack Engineer | Formester

July 2025 – Present

- Developed and maintained backend services for a production SaaS form builder platform
- Designed and optimized REST APIs for form creation, submission, and analytics
- Implemented webhook systems for third-party integrations
- Built AI-powered form generation and editing workflows using LLM APIs
- Worked on API versioning (v1 to v2) while maintaining backward compatibility
- Improved validation, performance, and reliability of high-traffic form submissions

Full Stack Intern | Acorn Globus

February 2025 – June 2025

- Worked on full-stack application development using Vue.js and Ruby on Rails
- Built and integrated REST APIs with frontend components
- Assisted in database schema design and query optimization
- Debugged and enhanced existing features based on client requirements
- Collaborated with senior engineers to deliver production-ready modules

SDE Intern | Excelling Technologies

June 2024 – December 2024

- Designed and developed a responsive learning platform UI using React Native
- Converted design concepts into functional, reusable components
- Deployed and managed the live application using Vercel
- Collaborated with the team to improve UI/UX for a CAD learning business

PROJECTS

NeuroPlan | [GitHub](#) | [Live](#)

- Built NeuroPlan, an AI-powered Flutter app that converts natural language goals into structured project roadmaps.
- Integrated GROQ-based AI with a pluggable provider architecture for future ChatGPT/Gemini support.
- Implemented Firebase Auth (Google Sign-In) and Cloud Firestore for secure user and project management.
- Delivered a cross-platform Material 3 UI supporting Android, iOS, Web, and Desktop.

Quiz Bowl Application | [GitHub](#)

- Flutter frontend with Express.js and TypeScript backend
- JSON-based quiz storage and individual submission handling

Engineers Day Registration System

- Built an Engineers Day event registration system using Next.js with PostgreSQL for participant data management.
- Implemented a secure online payment flow with transaction verification to confirm successful registrations.

EDUCATION

Master of Computer Applications (MCA)

Uttaranchal University, Dehradun | 2023 – 2025 | 80%

Bachelor of Science (B.Sc)

Sri Dev Suman University, Tehri | 2020 – 2023

CERTIFICATIONS

- Machine Learning – AcmeGrade
- JavaScript Algorithms and Data Structures - FreeCodeCamp
- Responsive Web Design - FreeCodeCamp

ACHIEVEMENTS

- Deployed a YouTube Downloader application with 1,000+ users
- Built and deployed a real-time chat application supporting concurrent connections
